AMENDMENTS TO THE WRITTEN DESCRIPTION

Please replace the paragraph bridging pages 17 and 18 with the following amended paragraph:

If it is judged that it is not necessary to change the filter (no at step S30) or when the use filter data is updated, a display list is generated at step S50. Specifically, objects to be drawn are enumerated and a list containing information necessary to draw each object such as polygon shapes, positions of the ~~apices~~ pieces of the polygons in the frame buffer, a Z value, and a color is generated. Perspective projection is performed in generating this list.
